Project Title: The Kid LAROI Website

This microsite will be a handful of separate pages, each built around one question a fan or first-time visitor might ask about the Kid LAROI. The Wikipedia article covers his whole life in one stretch of dense text, and breaking it up lets each topic get its own photos, layout and pacing. A menu bar will sit at the top of every page and fold into a button on phones, so the site works at any screen size.
